Dear Sir/Madam,

I am writing to express my interest in the software engineering internship position at your company. As a recent graduate of Sri Lanka Institute of Information Technology (SLIIT), where I earned a BSc (Hons) in Information Technology specializing in Information Technology, I am eager to start my career in software engineering.

Although my previous internship experience was in quality assurance, I realized that my true passion lies in software engineering. I have been teaching myself new technologies to strengthen my skills and knowledge in this field, and I am excited to put my new skills into practice with a company that values innovation and creativity.

As a detail-oriented individual with a strong desire to learn, I believe that I would be an asset to your team. During my time at SLIIT, I honed my problem-solving and analytical skills while working on various projects, including several web-based applications, a desktop application for timetable management and a mobile application for online learning. I am confident that my experience and skills make me an ideal candidate for this internship.

I am excited about the opportunity to work with your company and learn from experienced professionals. Thank you for considering my application. I look forward to the opportunity to discuss my qualifications further and learn more about this exciting opportunity.

Sincerely,

Udeepa Desarana,
